EXPERIENCE

Backend Developer May 2022 - Present
Silk Innovation *kupondole, Lalitpur*

- Developed and maintained applications using Laravel, Django, and React. Responsible for both backend and frontend development, including API design, server-side logic, and user interface integration, ensuring robust and scalable solutions.

PROJECTS

Completed and collaborated on 50+ projects utilizing Laravel, Django, and React. Demonstrated proficiency in full-stack development, including backend systems, front-end interfaces, and integration solutions.

ICFC Bank-Online Account Opening System. Developed an online platform for ICFC Bank allowing users to select services, open accounts, and manage roles, permissions, and authentication. Implemented document management and created an admin panel for efficient oversight and user management. ([Try it here](#))

Easy Fruits - Food Order App. Contributed to EasyFruits by integrating payment systems, enhancing layout design, and implementing Google Analytics. Developed email notifications, automated delivery calculations, and dynamic delivery charges based on distance.

LEADERSHIP

- Collaborated with Frontend and Backend Developers:** Led cross-functional teams, coordinating effectively between frontend and backend developers to ensure seamless integration and timely project delivery.
- Project Oversight:** Guided project development, providing direction and support to team members, and facilitating clear communication to achieve project goals.
- Mentorship:** Offered mentorship and support to junior developers, fostering a collaborative and growth-oriented work environment.
